network@climate-bridges.com

The Climate Bridges Network aims to improve the implementation of climate mitigation solutions in Southeastern Europe. Regular exchanges, joint campaigns and activities will all strengthen collaboration between members and foster cooperation between CSOs and governmental organizations.

SHARE IDEAS
DISCUSS CHALLENGES
FIND SOLUTIONS
EXCHANGE KNOWLEDGE

WHY?

Membership of the network offers numerous advantages, such as:

Fruitful Exchanges

Network members can exchange knowledge, ideas, challenges and solutions in the field of climate mitigation and adaptation.

International Partners

European and international projects often require partners from different countries. The transnational orientation of the network enables partnerships and offers access to useful information.

Effective Cooperation

Members work together on campaigns, projects, events and activities to strengthen cooperation and amplify their impact.

Efficient Communication

Members can use the communal website for sharing knowledge, event notifications and direct communication with other members.

Flexibility & Continuity

Each member may choose to be in the Network according to their capabilities and needs. The Network lives on the active participation of its members: The more they invest, the more they benefit.

WHAT?

The network holds regular exchange meetings and occasionally plans joint campaigns, events and projects.

WHO?

The network welcomes members from Slovenia, Croatia, Bosnia and Herzegovina, Montenegro, Serbia, Kosovo, Albania and North Macedonia and from neighbouring countries. Members may be civil society organisations (CSOs), public authorities or private institutions.

HOW?

Membership involves no fees or obligations: only the agreement of members to the terms of the Network by signing a Memorandum of Understanding (MoU).
